Installation of the USB driver
1. Double click on the **M770Tools** icon.

2. Or open the file via **Start > Program > M770Tools** to open the launcher.

3. Click on each button to open the programs.

Design Print Tool

Screen Saver Tool

4. Click on **USB Driver Installer** to install the communication driver.

5. The Device Driver Installation will open.
(If you have already established the direct PC-link, installation of the USB driver is not necessary)

→ Click on "**Next**".

6. Installation will begin.

7. During the installation, a "**Windows Security"** message will display.

→ Select "**Install this driver software Anyway**".

8. On 64-bit systems, the following message will display.

→ Select "**Install"**.

9. The "**Completing the Device Driver Instalation Wizard"** will display.

→ Click "**Finish"** to close the dialog.

10. Connect the sewing machine to the computer with the USB cable and turn the power switch of the sewing machine ON.

11. The computer will automatically begin searching for the driver…

12. And install the driver.
