### Warranty and Service

Elna's superior reputation was established in 1940 with the production of its first sewing machine. Ever since, Elna has continued to be a leading brand of home sewing and related equipment especially designed with the innovative sewer in mind. Thousands of professionals worldwide provide expert service. Millions of people have chosen Elna for its quality, performance and reliability.

## Elna 6001 Enticing homedecor

Your surroundings are an extension of your personal style. Customize any area of your home with Elna's new affordable computerized sewing machine, the 6001. Whatever creative concept you have in mind, the Elna 6001 is the machine for you. Reliable, easy to operate, capable of handling a wide variety of fabrics, from delicate sheers to heavy tapestry and upholstery, this machine is up to any challenge.

Ready to decorate? Simply turn on the machine and select one of the stitches especially chosen for this machine, clearly illustrated at eye level. Stitch width and length are pre-programmed for your convenience.

Looking for different accents? Experiment with the four automatic one-step buttonholes. Buttonholes aren't just closures anymore. Use them as a focal point. Surround a buttonhole with decorative stitching. Thread a curtain rod through a series of buttonholes.

Want more control over your sewing? Features like the electronic foot control, speed control, programmable up/down needle position and pattern completion/lock-stitch are the answer.

Sewing multiple layers? The extra lift for the presser foot allows you to easily insert the fabrics under the foot. Strong needle penetration guarantees the sewing results on all fabrics.

Like to keep things organized? Store accessories under the top cover or in the extension table that can be removed to expose the free arm.
