

Easy to use LED

Safety lock for transporting

Easy to carry, easy to store

Safety Features Provide Peace of Mind

The Elnapress Opal features several safety features to keep your home safe. An electronic buzzer will sound if the Elnapress is left closed for more than 10 seconds and the electricity is automatically cut off. The electricity is re-stored as soon as the Elnapress is opened again. With an automatic permanent shut off after 15 minutes of idleness, you will never run the risk of leaving the Elnapress Opal on accidentally. The built-in safety lock, designed to lock the two handles together, makes transporting and storing safe and easy.

The Elnapress Opal is Swiss made and is virtually maintenance free! It is energy efficient, and comes with a complete instruction manual and video to show you how to maximise your results.

Guarantee

The Elnapress trademark is known world wide. Millions of people have chosen Elna for its quality, performance and reliability. Expert services are provided by authorised Elnapress professionals.

SWISS MADE

Taking a load off your mind

Take some time and think about all the little things that put demands on your precious time. How long a list did you make? Is ironing on your list? And, where does it fit in on that list? Let us introduce you to the Elnapress Opal - it will surely help you cross one chore off your list.

The Elnapress Opal will literally cut your ironing time in half and take the drudgery out of ironing. With its large heating shoe and 45 kilos (100 pounds) of automatic pressure, the Elnapress Opal can iron a shirt in under one minute and press through three to four layers in one go. The special design of the ironing board allows you to manage everything from large flat items to fitted and time consuming garments, quickly, easily, effortlessly.

Temperature control is at your fingertips. Move from a low temperature setting such as silk to a high temperature setting like cotton. Use the Elnapress Opal comfortably seated at any table. Then, just close it and store conveniently.

Delicate knits are easy to handle

No sagging, no unwanted wrinkles

Attach elegant rhinestones and fun patches

The Elnapress Opal also comes with special features such as the Vap-O-Jet and an integrated sleeve board. The Vap-O-Jet will give you the benefits of steam using regular tap water. The sleeve board simply pivots into place and will help you iron difficult to reach areas and small items such as children's clothing.

With a bit of steam, the perfect temperature setting and automatic pressure, the Elnapress Opal will press professional creases into your trousers; it will touch up pleats and jackets; it will handle all your special fabrics from hand knits to velvets; and, it will transfer decorative patterns or rhinestones without a hitch.

The Elnapress Opal will not leave shiny marks on fabrics, it will not add extra wear and tear to clothes, and it will not push cotton knits along like a hand iron leaving the bottom sagging.

Press a shirt in under a minute

Place sleeve cuffs on Sleeve Board

Iron several layers with ease

Pay attention to details

Produce professional creases with steam
