Stitchitize

Embroidery Design Service

Stitchitize is a professional design studio that has produced over 50,000 embroidered designs since 1984. Stitchitize is the design development division of a family business started by Wendy and George Conquer-good that has now grown to over 20 employees. Their sons, Trevor and Carl, and daughter Andrea, have all become involved in the company over the years. Trevor, the manager of Stitchitize Embroidery Design Service, produces Club Stitchitize, and the Learning Studio. Carl is the design manager of Custom Digitizing, producing embroidery designs for consumers and corporate clients alike. Stitchitize has a design team of 10 people all working full-time on creating embroidery designs. The information exchange between our artists and designers is incredible, promoting new ideas all the time. Since we all look at things in life from different perspectives, this information exchange is valuable to the development of a well rounded digitizer. This combined knowledge of embroidery design creation is now available online through the Embroidery Design Learning Studio, a separate site with paid membership. Club Stitchitize, the customer appreciation part of our website, combines free designs with photos of our family. Trevor travels extensively to teach the Stitchitize Embroidery Design Road Show, a class about the art of digitizing, check our site for a class near you. Stitchitize has spent many years creating a collection of stock embroidery designs that you will love to sew. These designs are available online or through one of our dealers. Please visit our website www.stitchitize.com to learn more about the Stitchitize Embroidery Design Service.

How To Use This Product

- There is nothing to install!
- Choose a design from this catalogue. Note the design number, i.e. Mh001.
- Insert CD.
- The folder structure will appear as shown:
- Locate the embroidery design in desired format under the **Embroidery Designs** folder.
- Open the embroidery design and prepare to sew using your usual method/ software.
- View/Print the design sewing instructions in .html format from the **Printable Pages** folder.
- A full-colour 8.5" x 11" catalogue can be found and printed from the **Printable Pages** folder. Due to file size, it is recommended that you save this file to your computer.
 - Right-click on catalogue .pdf
 - Left-click on "save target as" from drop-down menu
 - Save to a folder on your computer hard drive
 - Open from computer using Acrobat Reader (free version available at <http://www.adobe.com/products/acrobat/readstep2.html>)

- Special technique instructions such as Applique and Macro Hoop can be found and printed from the **Printable Pages** folder.

Formats: .jef (Elna)
.emb (Wilcom Resizeable)

In order to resize designs from this collection, visit Wilcom and download free software. <http://www.wilcom.com.au/truesizer/Truesizer.cfm>

Open the .Emb format to make resizing edits, save as .Jef to read and sew in your embroidery machine.

Look in the .txt or .pdf help files for more detailed instructions.

MacroHoop Instructions

* Please note: All MacroHoop instructions are available for viewing and printing in .pdf format on the CD.

The MacroHoop dimensions are 28cm H x 20cm W (11" x 7.9"). This equates to two 20cm x 20cm square hoops with a 12cm (4.7") overlap.

There are two ways to get the MacroHoop designs from this CD onto your machine and ready to sew.

1. Elna Customizer EX

If you have *Elna Customizer EX* installed on your computer, the MacroHoop designs can be opened by clicking on the "Open" folder icon.

Search your computer for the CD drive, locate the design that you want to sew and open it on your Customizer screen.

The design can be saved to an ATA PC card

or sent directly to your machine

2. Drag and Drop

If *Elna Customizer EX* is not available for use, the MacroHoop designs can be saved to your ATA PC card by locating and opening the CD in Windows Explorer. Click, Hold and Drag the design to the EMB folder on your card.

SEWING WITH MACROHOOP

Hooping for the MacroHoop requires extra stability due to the larger sewing field. It is recommended that the fabric be prepared for embroidery with iron-on fusible larger than the hoop area OR a medium weight cut-away stabilizer (backing) be hooped with the fabric, together in the hoop. In addition, a layer of medium weight tearaway can be slid under the hoop for optimum stabilization of fabric and stitches.

Once the designs are ready to sew and the fabric is prepared and hooped in the MacroHoop, shift the frame to position 1 and attach to machine.

Place the plastic template (provided with the hoop) into the six notches at the inner hoop ring. Use the four "jog" keys on the screen:

Move the hoop until the needle passes through the Exact Center of the "Starting Point" hole in the template.

Detach the hoop from the machine and shift the frame to position 2 and reattach to machine.

Remove the plastic template and start sewing the design. Follow the colour stops to sew the entire second design.

Please Note: When reading this CD from the Elna external CD-ROM drive, MacroHoop designs will display and sew as one complete design. The machine may not indicate when to Shift Frame. In order to Shift Frame to hoop position #2 at the correct stop in the design, you will need to follow the sewing sequence for the design found in the "Printable Pages" folder under "Sewing Sequences". Shift Frame to position #2 at Side Two as indicated on the sewing sequence.

Remove the plastic template and start sewing the design. Follow the colour stops to sew the entire first design. When it is complete you will be prompted to "lift presser foot and shift frame".

Be sure to follow the same steps with the plastic template (needle passing through exact center of starting point) for the second side of the design. This will ensure that both sides will line up correctly.
